Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 July 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Pocket Assembly Forming Different Size Assemblages.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hatt (US 5,065,094). Hatt discloses an apparatus for use in forming sheet material assemblages that includes a pocket assembly moveable past feeders (see US 4,723,770 incorporated by reference) with forward (2) and rear walls (3); a mechanism for opening folded cover sections of different sizes that includes a first gripper (24) and a second gripper (35) for gripping one side of a folded cover section of a different size; and a presser (5). The examiner notes that the grippers (24 and 25) are each capable of gripping sheets of a range of sizes ($8 \frac{1}{2} \times 11$, $8 \frac{1}{2} \times 10 \frac{15}{16}$, $8 \frac{1}{2} \times 11 \frac{1}{16}$, etc.).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3651

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Linder et al. (US 6,311,968) in view of Hatt (US 5,065,994). Linder discloses an apparatus for use in forming sheet material assemblages that includes a pocket assembly moveable past feeders with forward and rear walls (see col. 3, lines 29-30); a gripper (17); an operator assembly connected to the gripper (see col. 3, line 53, "control slide"); a presser (20); an operator assembly (22); and an actuator (see col. 4, line 2, "cam track") operable between an active position (when it cams the operator assembly) and an in active position (when it does not cam the operator assembly). Linder discloses all the limitations of the claims, but it does not disclose a first gripper and a second gripper. Rather, Linder discloses only one gripper. However, Hatt discloses a first gripper (24) and a second gripper (25) for the purpose of securing both edges of a cover. It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Linder by utilizing a first gripper and a second gripper, as disclosed by Hatt, for the purpose of securing both edges of a cover.

Allowable Subject Matter

6. Claims 6-15 are allowed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
